SUMMARY

Full-stack engineer with 4+ years building scalable systems processing 100K+ daily events. Specialized in event-driven architectures (Kafka, Celery, Redis, WebSockets) with Docker and AWS. Reduced manual workflows by 60–70% across 3+ internships while shipping 5+ production apps for freelance clients.

TECHNICAL SKILLS

Languages: Python, Java, C#, C++, JavaScript, TypeScript, SQL, PHP

Frontend: React.js, Angular, HTML5, CSS3, Tailwind CSS

Backend & Frameworks: Django, Django Channels/Daphne, Node.js, REST APIs, gRPC, Laravel, Spring, .NET

Databases: PostgreSQL, MySQL, SSMS, Redis

DevOps & Cloud: Docker, AWS, AWS CDK, Kafka, Nginx, Gunicorn

Core Concepts: Data Structures, OOP, API Architecture, System Design, Testing

EXPERIENCE

Saifee Burhani Uplifment Trust | *Software Development Intern*

Apr 2026 – Jul 2026

- Cut document retrieval time by 80% by building a .NET module that auto-converts 10,000+ stored byte records into downloadable files, eliminating a 2-day manual process.
- Reduced operational turnaround by 60–70% after designing 4 automation modules that replaced multi-day manual workflows with one-click solutions.
- Developed 6+ responsive front-end features in Angular serving 500+ daily users and optimized 50+ SQL queries in SSMS.

Logiqids | *Software Development Intern*

Jan 2025 – Jan 2026

- Engineered Python automation scripts reducing 30% manual workload, saving 8–10 hours weekly across a team of 15 engineers.
- Built and executed 20+ unit and integration test cases, catching 25% more defects pre-production and reducing post-release bugs by 15%.
- Delivered 3 production features within aggressive sprint deadlines using agile methodology with zero critical bugs.

Tejyash Cyber Solution | *Cloud & Hardware Intern*

Jul – Aug 2023

- Deployed 3 cloud-based applications on AWS and resolved 25+ critical hardware/software incidents, improving system uptime by 15% for 200+ users.

Freelance | *Full-Stack Developer*

2023 – Present

- Designed and deployed 5+ production-grade responsive web applications for clients using React.js and Node.js, serving 100+ monthly active users.
- Integrated RESTful APIs with PostgreSQL databases, reducing page load time by 20% and improving Lighthouse performance scores from 65 to 92.
- Live Projects: pureecare.com, rajelectricalsandtools.com, swanleatherexports.com, fatemakanch.com, amcopaints.com

PROJECTS

Full-Stack Environmental Management System — *Django, React, PostgreSQL, Redis, Celery, WebSockets*

[🔗 Link](#)

- Built a full-stack environmental audit platform handling 100+ records with role-based workflows and real-time notifications via Django Channels, Daphne, and Redis WebSockets; achieved 95% async task reliability with Celery.

Geofencing Attendance System — *PHP, MySQL, Ajax, Google Maps API*

[🔗 Link](#)

- Built a location-aware attendance platform processing daily check-ins across locations with 98% geofencing accuracy using Google Maps API and real-time AJAX dashboards.

Event-Driven Patient Management System — *Spring Boot, Kafka, gRPC*

[🔗 Link](#)

- Architected 5 modular microservices handling 100+ concurrent patient records with Kafka event streaming (500 msgs/sec) and gRPC communication; secured with Spring Security/JWT, deployed via AWS CDK.

MERN Stack E-Commerce Platform — *React, Node.js, MongoDB, Stripe*

[🔗 Link](#)

- Built a full-featured e-commerce platform supporting 150+ products and processing \$15K+ in test transactions with Stripe Checkout, JWT authentication, and webhook-based payment handling.

Video Streaming Platform — *Django, ImageKit, HLS*

[🔗 Link](#)

- Built a video-sharing platform with auth, subscriptions, playlists, and search; integrated ImageKit for HLS adaptive playback and creator-focused social features.

EDUCATION

M.H. Saboo Siddik College of Engineering

B.E. Computer Science (IoT, Blockchain, Cybersecurity)

Aug 2023 – May 2026

M.H. Saboo Siddik Polytechnic

Diploma in Computer Engineering

Aug 2020 – May 2023
